

Copilot Agent Accelerator: Build, Deploy, Manage

Build your first AI Copilot agent with confidence and hands-on support.

Course Overview

Step into the driver's seat of AI innovation with DSI's Copilot Agent Accelerator—a practical, instructor-led course designed to take you from concept to deployment with confidence.

If you've already worked with Microsoft's Power Platform and are ready to bring AI agents into your business workflows, this course is your next move. In just two focused days, you'll learn how to design, build, and deploy your first AI-powered Copilot using Microsoft Copilot Studio—all while gaining a deep understanding of how to manage and evolve your agent as your needs grow.

Real skills. Real outcomes. Backed by hands-on experience.

What You'll Learn

- **Get grounded in the Microsoft Copilot ecosystem:** Learn how Copilot Studio fits within Power Platform, Microsoft 365, and Azure AI—so you can make smart architecture decisions from day one.
- **Define your Copilot strategy:** Identify high-impact use cases, align them with business goals, and design an agent that delivers measurable value.
- **Build hands-on in Copilot Studio:** Follow step-by-step guidance to create your first Copilot, including knowledge bases, triggers, workflows, and integrations.
- **Go beyond the basics with AI and automation:** Incorporate AI Builder and Power Automate to extend your agent's functionality, automate responses, trigger actions, and enhance user interactions.
- **Own the management lifecycle:** Learn how to maintain, scale, and fine-tune your Copilot over time, so it continues to evolve with your business.

Why This Course

You don't just want to learn what Copilot can do—you want to do it. This course is built for practitioners. You'll walk away with:

- A working Copilot Agent built in a lab environment
- A clear framework for identifying future use cases
- Best practices for design, customization, and governance
- Confidence to independently manage and scale your AI agents

Who Should Attend

This course is ideal for:

- Power Platform users with intermediate to advanced experience
- Solution architects, business analysts, and technical leads
- Anyone exploring how to operationalize AI agents in real-world business processes

Why Learn with DSI

As a Microsoft Solutions Partner with deep expertise in Power Platform, Copilot Studio, and AI integration, DSI helps organizations move from concept to execution faster. We've worked with clients across industries to modernize operations, automate workflows, and activate AI agents that drive real business value.

Whether you're building your first Copilot or scaling an enterprise-wide rollout, DSI brings the practical insight, hands-on support, and Microsoft-aligned frameworks to help you achieve your goals confidently.

Meet Your Instructor

Rosemarie Biacolo

With over a decade of experience and technical expertise in Intelligent Automation and Business Applications, Rosemarie is dedicated to creating impactful enterprise solutions within the Microsoft Power Platform, Azure and RPA landscape. Certified and experienced, she has led and delivered 150+ projects, building scalable, reliable, and robust applications and automations that drive value for end-users and optimize business processes.

She has had the privilege of working with clients across diverse industries—including Financial, Telecom, Technology, Retail, Manufacturing, Transport, and Health Services— designing automation solutions that make a real difference in operational efficiency and process improvement.

Ready to Launch Your First Copilot?

Sign up for the Copilot Agent Accelerator and walk away with a fully built AI agent—and the know-how to manage and scale it on your own terms.
