Power Platform Developer Foundations: Build Apps, Automate Workflows

Start building apps and automations that make an impact.

Course Overview

If you're ready to go beyond the basics and start building with Power Platform, this course is your launchpad. **DSI's Power Platform Developer Foundations** workshop is a two-day, hands-on training designed for professionals who want to create business apps and automate everyday processes, without relying on dev teams or third-party tools.

This course guides you through the essentials of Power Apps and Power Automate, starting with app design fundamentals and moving into multi-step automation using common tools like SharePoint, Microsoft Forms, and Teams. Whether you're supporting internal teams or building solutions yourself, you'll gain the practical skills and confidence to put Power Platform to work.

Real skills. Real outcomes. Backed by hands-on experience.

What You'll Learn

- **Power Apps Essentials:** Learn the key differences between canvas and model-driven apps and when to use each. Then get hands-on building apps using **Dataverse**, custom forms, views, and process flows.
- **Power Automate Fundamentals:** Understand the types of flows, how to work with triggers, and how to connect services like Outlook, Teams, SharePoint, and Microsoft Forms.
- **Build with Logic:** Use conditions, dynamic content, approvals, and variables to build smarter, more flexible workflows.
- **Develop Complete Workflows:** Combine inputs, actions, and outputs to build **real-world automations** that support approvals, responses, and data submission across Microsoft 365 tools.

DSI DIMENSIONAL STRATEGIES INC

Why This Course

This is not a lecture. It's a working session for professionals who want to *build*. You'll walk away with:

- A working knowledge of how to create apps and flows
- Four guided labs covering apps, approvals, logic, and integrations
- Best practices for working with Dataverse, Forms, and SharePoint
- A foundation to confidently start or expand your Power Platform projects

Who Should Attend

This course is a fit for:

- Business users looking to take ownership of internal tools
- IT and operations professionals interested in app development or automation
- Citizen developers who want to sharpen their Power Platform skills
- Anyone who wants to build apps and automate workflows—no coding required

Why Learn with DSI

DSI is a Microsoft Solutions Partner with decades of experience helping teams build secure, scalable solutions on the Power Platform. We've trained professionals across industries to take control of their tools, solve business problems faster, and reduce reliance on overburdened IT departments.

When you learn with DSI, you're not just getting product training—you're gaining insights from a team that builds with Power Platform every day.
