

# Power Platform Governance Bootcamp: Admin, Secure, Deploy

# Learn the essentials to govern, secure, and scale Power Platform.

## Course Overview

Governance isn't just a checklist—it's what makes scale sustainable. **DSI's Power Platform Governance Bootcamp** is a compact, high-impact training session built for IT professionals, platform admins, and solution architects who need to manage Power Platform environments with precision and confidence.

Over the span of four focused hours, this essentials workshop walks you through the core strategies and technical steps for governing Power Platform effectively—from setting up environments and applying data policies, to automating deployments through DevOps integration.

Whether you're preparing to launch new solutions or looking to bring structure to an already-growing Power Platform footprint, this course equips you with the tools to manage, secure, and scale your Power Platform operations.

**Real skills. Real outcomes. Backed by hands-on experience.**

## What You'll Learn

- **Build a smart environment strategy:** Learn how to structure Power Platform environments to support development, testing, and production workflows.
- **Implement secure data policies:** Set up Data Loss Prevention (DLP) policies that protect your data and align with internal compliance requirements.
- **Manage users and solutions effectively:** Apply best practices for user access, permissions, and solution lifecycle management.
- **Streamline deployments with ALM:** Use Power Platform Pipelines and Azure DevOps build tools to automate and standardize deployment workflows across teams.
- **Get hands-on with real tools:** Through live demonstrations, you'll see what successful governance looks like in action.

## Why This Course

Governance isn't optional if you're responsible for Power Platform operations—especially in growing or complex environments. This course gives you:

- Proven frameworks for setting up and managing secure environments
- Practical insights into deployment pipelines and DevOps integration
- Best practices for DLP, user roles, and solution management
- A roadmap for sustainable, scalable platform administration

## Who Should Attend

This session is designed for:

- Power Platform administrators
- IT leaders and technical leads
- Solution architects and DevOps engineers
- Anyone responsible for Power Platform governance and compliance

## Why Learn with DSI

DSI is a Microsoft Solutions Partner with deep roots in Power Platform governance, application lifecycle management, and secure solution delivery. We help organizations build guardrails that support innovation at scale, balancing flexibility with control

From environment setup to DevOps automation, DSI brings real-world governance experience that goes beyond documentation. We've helped clients across industries build governance frameworks that grow with them, and we're ready to help you do the same.

# Meet Your Instructor

**Rosemarie Biacolo**

With over a decade of experience and technical expertise in Intelligent Automation and Business Applications, Rosemarie is dedicated to creating impactful enterprise solutions within the Microsoft Power Platform, Azure and RPA landscape. Certified and experienced, she has led and delivered 150+ projects, building scalable, reliable, and robust applications and automations that drive value for end-users and optimize business processes.

She has had the privilege of working with clients across diverse industries—including Financial, Telecom, Technology, Retail, Manufacturing, Transport, and Health Services— designing automation solutions that make a real difference in operational efficiency and process improvement.

## Ready to Build with Confidence?

Reserve your spot in the Power Platform Governance Bootcamp and gain the clarity, tools, and practical knowledge you need to govern with confidence.
